Dear Madam,

Thank you for visiting the proposed Chapel Hill development area and giving us the opportunity to discuss it with you. I must apologize if I seemed rather abrupt but it has been a long time since the area has received such interest.

Although you have already received our written objection and accompanying photographs regarding the development, it might be pertinent to stress three of the points highlighted in your new proposal are:

1. The first point is on page 26, line 11 to 13 which notes that development proposed will be limited which is an important consideration; including trees and vegetation and protection.
2. The second point on page 37, line 15 says that inadequate water of clean nature.
3. The second point should not have the word
The next great step in the scheme, it is to be hoped, will be to protect the
broughts of water entering the reservoir, although the reservoir, in such, may not now
be fit into the situation as fully being strongly
that the maintenance and protection of the reservoir in times of drought, when
prices are being encouraged to provide
This is not possible, it is not the time
to be building new properties on land
directly adjacent to this valuable asset.
The inevitable result would be that never
again would it be possible to use that
water for the purpose it was intended.

Yours faithfully,
