I consider the Core Strategy to be UNSOUND.
It includes too many additional houses to be built in Clitheroe; no more than 25% of the additional houses planned for the Ribble Valley should be built in Clitheroe. The infrastructure of Clitheroe (roads, carparks, transport, utilities, education, health service, etc) is inadequate for such a large number of additional houses.
A higher number of affordable houses should be built in the villages, without this the villages will decline and junior schools and other facilities in the villages will close.
