Dear Sir/Madam,

With reference to the number of houses proposed in your Core Strategy. I have to say that I am against these large numbers. This is for several reasons: -开发者 is not geared up to absorb such large numbers of people. In education, roads, car parking etc. If it goes ahead in my view it will totally ruin开发者.

In my view the number of houses should be, for the requirement of the people of开发者 + 10%.

It should not be building houses for large numbers of people to come to live in developers from other areas. How many councillors who voted for this actually live in developers.

Yours faithfully
