Dear Sirs,

I am very concerned that the G6 Essential Open Space in Longridge is again being threatened, particularly the land in Higher Rd.

Following the visit of the Appeals Inspector in February 2012, the report stated that development would have an adverse effect on the visual amenity or character of the area. I fully agree with that statement. The new Core Strategy Plan, as it stands, does not provide for future protection of private land that has hitherto been G6 Essential Open Space.

Traffic in Higher Rd. at weekends is already great, with cars parked on both sides of the road, or footpaths. Vehicles are often left outside my house from Friday afternoon until Monday, obstructing my view of oncoming traffic in both directions. Any more cars emerging from new properties will be not only intolerable but dangerous.
In Tanyridge there are
exemptions properties for sale
or rent without the need
to overreach on the green
spaces one enjoy.

Yours faithfully
