To the inspector of the Core Strategy,

I know you have a wealth of suggestions to get through, so I'll make my two penny worth short and sweet... The proposals which have been outlined by the RVBC are all very good... IF handled with thought and moderation... BUT, if you inject all the negatives into the equation and exercise the greed by developers,... a computer, not a biased under-the-cosh human being would state that it is the formula for misery to the existing residents (whom you represent) and a super Tax on a down graded infrastructure. If you value this part of the Country, and the peoples sense of preservation... then I hope you will bring justice and moderation to the planning proposals. Thank you...

Yours truly,
