Dear Sir,

Re: Core Strategy Consultation

We are concerned that the proposed Core Strategy document contains no protection for Private Open Space currently designated as 6.6 Special Class Space. We feel that this is unsatisfactory. Private open space needs protecting because of its visual amenity value and also it will act as a green area in an ever-developing community, it generally supports a wide variety of plants and animals and also public open space.

Please think again on the issue of private open space in our community, protecting administrative areas & its value, it is an important natural feature of our community.

Yours sincerely,

[Signature]
