Phil, this might be a response to the core strategy consultation.

As a member of , I agree we do need affordable housing in the Ribble Valley. However, this MUST be for use by Ribble Valley residents only and MUST NOT be sold to outsiders for them to profit through a "buy to rent" motive. <br />

Most Importantly, siting of new property MUST be on a proportionate basis to local population, ie Clitheroe 25% of total new housing equates to 25% of total Valley inhabitants. <br />

It would also make sense to consider the number of retail housing properties currently vacant in Clitheroe, which, due to the ongoing economic downturn is likely to increase over the next 5/10 years. Do we need any further extension of this?
