Subject: Proposal to build 1670 new houses in Clitheroe

Dear Sir,

I wish to state my objection to the proposals to build a large number of houses in the Ribble Valley.

Making up only 25% of the Ribble Valley population, I believe that we should not have to take up more than 25% of the planned house building. If the proposal becomes reality an enormous strain would be put on our resources.

This plan is unsound as our existing infrastructure would be unable to cope with the massive demand that would be put upon the health service, education and schools, transport, leisure and utilities.

Regards
