Dear Sir or Madam,

Parks playing fields informal open spaces allotments and private gardens can all be of great importance to the character of a neighbourhood. Open space is not just an amenity for public recreation but an important consideration in the conservation of natural and built heritage of the area.

The Borough Council will retain development proposals which involve the loss of existing public and private open space unless it does not
compromise visual amenity in private recreation the value of general openness and the character of the area.

P.S. Please don't build on our lovely green land.

Yours
