You have no plans to build extra primary schools and cannot gain sufficient information on practices outside Rippled Valley boundaries where availability may be possible.

There are no plans to redevelop or provide extra facilities at Chilnocks Hospital and you state the town's plan does not mean it will be developed.

To improve the economic climate and for successful implementation of your plans, you need access to these figures.

I firmly believe that Chilnocks should not be expected to build more than 25% of any new development plan. On this basis the town makes up 25% of the Rippled Valley population.

I send you this proposal as both the National Planning Policy Framework document and the Rippled Valley at the 1670 new houses proposed for Chilnocks will see 42% extra people. 2269 more cars. These figures have been calculated using previous figures in the Core Strategy, which are taken from the 2001 census.

I am writing to object to the proposed Core Strategy and Infrastructure Documents which are currently available for consultation.
