1 PURPOSE

1.1 To provide those members charged with Governance with information on the recent changes to the Prudential Code.

1.2 Relevance to the Council’s ambitions and priorities:
   • Community Objectives – none identified
   • Corporate Priorities - to continue to be a well-managed Council providing efficient services based on identified customer need. To meet the objective within this priority, of maintaining critical financial management controls, ensuring the authority provides council tax payers with value for money.
   • Other Considerations – none identified.

2 WHAT IS THE PRUDENTIAL CODE

2.1 Key to the current system of capital finance is CIPFA’s Prudential Code. It is a professional code of practice to support the decisions councils have to make to plan for capital investment at a local level and encompasses the accompanying requirements of the statutory Guidance on Local Government Investments as issued by the Secretary of State (Annex 1).

2.2 Councils are required by regulation to have regard to the Prudential Code when carrying out their duties under Part I of the Local Government Act 2003.

2.3 The code applies to all local authorities, including police, fire and other authorities defined in the enabling primary legislation.

2.4 The key objectives of the code are:
   • to ensure within a clear framework that capital expenditure plans are affordable, prudent and sustainable
   • that treasury management decisions are taken in accordance with good professional practice
   • that local strategic planning, asset management planning and proper option appraisal are supported; and
   • to provide a clear and transparent framework to ensure accountability.

2.5 In order to demonstrate that we have fulfilled the objectives of the Prudential Code, we are required to prepare, monitor and report on a number of indicators. These have to be set annually on a three year basis as a minimum and are designed to support and record local decision-making, rather than be a means of comparing authorities.

2.6 Prior to review of the Prudential Code, the indicators that have to be set and monitored relate to:
   • External Debt (Authorised Limit, Operational Boundary and Actual External Debt)
• Financing Cost to Net Revenue Stream
• Capital Financing Requirement
• Capital Expenditure
• Impact of Capital Investment Decisions on Council Tax
• Gross Debt and Capital Financing Requirement
• Gross and Net Debt
• Interest Rate Exposures
• Maturity Structure of Borrowing
• Principal Sums Invested for Greater than 364 Days
• Formal Adoption of the CIPFA Treasury Management Code of Practice

3 WHY HAS THE PRUDENTIAL CODE CHANGED?

3.1 There have been many changes in Local Government since the production of the initial Prudential Code, particularly around austerity and commercialism. The potential risks from both these areas have been recognised as particularly concerning by CIPFA.

3.2 When CIPFA were reviewing the Prudential Code last year, they saw that it was important to ensure that the changes were there to strengthen and improve the existing framework and that any changes within public sector service delivery and processes continued to reflect transparency, accountability and good decision making.

3.3 The Prudential Code plays a pivotal role in providing assurance that the decisions made around capital finance have at their heart the principles of:
• Affordability
• Sustainability
• Prudence

3.4 The Code framework aims to be structured in a way that is flexible enough to support innovation, but to be durable enough to essentially provide assurance for those who operate within its principles and those who oversee that activity.

4 WHAT HAS CHANGED WITH THE REVIEW OF THE PRUDENTIAL CODE?

Capital Strategy

4.1 Key developments for the new version of the Code include the introduction of more contextual reporting through the requirement to produce a capital strategy along with streamlined indicators.

4.2 The introduction of a capital strategy allows individual local authorities to give greater weight to local circumstances and explain their approach to borrowing and investment. As with many authorities, being a new requirement, this is not a formal strategy that is currently produced.

4.3 However, many of the elements that would be included in such a strategy are already considered at many of the stages that we currently follow in setting our capital programme.

4.4 The capital strategy must form part of our integrated revenue, capital and balance sheet planning – so key to the production of our budgets. The strategy must also set out the long term context in which our capital expenditure and our investment decisions are
made. As a result there will be links where appropriate from this strategy to our Treasury Management Strategy.

4.5 The strategy must also reflect on risk and reward and the impact on the achievement of our priorities. The Director of Resources must also report explicitly on deliverability, affordability and risk associated with the Capital Strategy.

4.6 Below is a summary of the main sections that would be anticipated in a Capital Strategy going forward

- **Capital Expenditure**
  - Governance
  - Long term plans
  - Asset management planning
  - Restrictions around funds

- **Investments and liabilities**
  - Approach, due diligence, risk appetite
  - Governance process for approval and monitoring
  - Summary of material investments, guarantees and liabilities

- **Treasury management**
  - Governance
  - Long term planning including MRP
  - Risk appetite, key risks and sensitivities

- **Skills and knowledge**

4.7 Our Capital Strategy will be developed over the coming months and brought back to committee for approval in order to play a role going forward.

**Adoption of CIPFA’s Treasury Management Code**

4.8 The new Code has removed the requirement for us to state that we have adopted CIPFA’s Treasury Management Code.

4.9 This is not a change to diminish the gravity of the Treasury Management Code, but more to reflect that in reality we have no option other than to adopt CIPFA’s Treasury Management Code, and so does not need to be specifically stated in any policy.

**Principles Apply to Mayors, Combined Authorities and Group Entities**

4.10 The new Code has made specific reference and given clarification that the principles of the Prudential Code also apply to Mayors, Combined Authorities and Group Entities.

**Requirement to Consider Explicitly Separate Ring-Fenced Funding streams**

4.11 Where ringfenced resources or separate funds exist, affordability must be considered only against those resources available to fund borrowing.

4.12 Under combined authority arrangements affordability may need to be considered against combined authority resources and the impact on underlying authorities. Where debt or guarantees relating to local enterprise partnerships (LEPs), subsidiaries or other corporate and non-corporate bodies exist, the impact on the council should be considered.
Deletion of Council Tax Indicator
4.13 Previously the Code required that we forecast the potential impact of our capital programme decisions on the council tax level. This indicator gave a forecast financial value per Band D property.

4.14 It has been recognised that this does not necessarily link to the decision making processes taken in setting the council tax level and has therefore been removed from the Code.

Other Matters
4.15 Other changes had been proposed on drafts of the new Prudential Code, however, these have not been taken forward in to the final version.

4.16 It does not include an explicit ban on borrowing for profit-making investment, as had previously been proposed. However, it is understood that there are likely government moves to prevent councils using loans to fund out-of-area property investments. There has recently been growing concern in the Treasury about the scale of council borrowing to fund commercial investments.

4.17 The Code includes the statement that councils “must not borrow more than or in advance of their needs purely in order to profit from the investment of the extra sums borrowed”.

4.18 The government’s Local Authority Investment Code stipulates that where a local authority chooses to disregard the Prudential Code and Guidance and borrows or has borrowed purely to profit from the investment of the extra sums borrowed, the Treasury Management Strategy should explain:
   • Why the local authority has decided not to have regard to this Guidance or to the Prudential Code in this instance; and
   • The local authority’s policies in investing the money borrowed, including management of the risks, for example, of not achieving the desired profit or borrowing costs increasing.

4.19 The government’s Local Authority Investment Code also states that where a local authority classifies an investment as contributing to regeneration or local economic benefit, it should be able to demonstrate that the investment forms part of a project in its Local Plan.

5 CONCLUSION

5.1 There have been a number of changes to the Prudential Code in this latest review by CIPFA in order to better reflect the current landscape that we operate in of austerity and commercialism.

5.2 Risk is a key factor under the Code and this is reflected in other moves to ensure considerations around return on rental yields and borrowing to support such ventures.

5.3 The changes to the Prudential Code have other consequential impacts on the CIPFA Treasury Management Code. These have been reflected in our updated Treasury Management Strategy and Treasury Management Policies and Practices, as approved by Policy and Finance Committee at their last meeting on 20 March.
POWER UNDER WHICH THE GUIDANCE IS ISSUED

1. The following Guidance is issued by the Secretary of State under section 15(1)(a) of the Local Government Act 2003. Under that section local authorities are required to “have regard” to “such guidance as the Secretary of State may issue”.

DEFINITION OF TERMS

3. Local authority has the meaning given in section 23 of the 2003 Act. To the extent that this guidance applies to parish councils and charter trustees (see paragraph 11) a reference to a local authority includes those councils and trustees.

4. The definition of an investment covers all of the financial assets of a local authority as well as other non-financial assets that the organisation holds primarily or partially to generate a profit; for example, investment property portfolios. This may therefore include investments that are not managed as part of normal treasury management processes or under treasury management delegations.

5. For the avoidance of doubt, the definition of an investment also covers loans made by a local authority to one of its wholly-owned companies or associates, to a joint venture, or to a third party. The term does not include pension funds or trust fund investments, which are subject to separate regulatory regimes and therefore are not covered by this guidance.

6. A credit rating agency is one of the following three companies:
   - Standard and Poor’s;
   - Moody’s Investors Service Ltd; and
   - Fitch Ratings Ltd.

7. For the purposes of this guidance a loan is a written or oral agreement where a local authority temporarily transfers cash to a third party, joint venture, subsidiary or associate who promises to return it according to the terms of the agreement, normally with interest. This definition does not include a loan to another local authority, which is classified as a specified investment.

10. The **Capital Strategy** is the strategy required by the updates to the Prudential Code and Treasury Management Code.

**APPLICATION**

**Effective date**

11. This guidance applies for financial years commencing on or after 1 April 2018. It supersedes all previous editions of the Statutory Guidance on Local Authority Investments.

12. Strategies presented to Council or equivalent before 1 April 2018 but relating to 2018-19 and future financial years do not need to include all of the additional disclosures required by this edition of the guidance should it not prove practical or cost effective to do so. If a local authority chooses not to include the new disclosures in its 2018-19 Strategy, it must include the disclosures in full in the first Strategy presented to full Council or equivalent after 1 April 2018.

**Local authorities**

13. This guidance applies to all local authorities in England.

14. This guidance applies to parish councils and charter trustees, providing their total investments exceed or are expected to exceed £100,000 at any time during the financial year. Where a parish council or charter trustee expects its total investments to be between £10,000 and £100,000, it is encouraged to adopt the principles in this guidance.

**KEY PRINCIPLES**

**Transparency and democratic accountability**

15. For each financial year, a local authority should prepare at least one Investment Strategy (“the Strategy”). The Strategy should contain the disclosures and reporting requirements specified in this guidance.

16. The Strategy should be approved by the full council. For authorities without a full Council, the Strategy should be approved at the closest equivalent level. The
Secretary of State recommends that the Strategy should be presented for approval prior to the start of the financial year.

17. Where a local authority proposes to make a material change to its Strategy during the year a revised Strategy should be presented to full council or equivalent for approval before the change is implemented.

18. The Strategy should be publicly available on a local authority’s website. Where a parish council or charter trustee does not maintain its own website, they should post a public notice detailing how local residents can obtain a copy of the Strategy, free of charge.

19. Where a local authority prepares a Capital Strategy in line with the requirements of the Prudential Code, a Treasury Management Strategy in line with the requirements of the Treasury Management Code, or any other publicly available document, the disclosures required to be included in the Strategy can be published in those documents instead of in the Strategy.

**Contribution**

20. Investments made by local authorities can be classified into one of two main categories:
   - Investments held for treasury management purposes; and
   - Other investments.

21. Where local authorities hold treasury management investments, they should apply the principles set out in the Treasury Management Code. They should disclose that the contribution that these investments make to the objectives of the local authority is to support effective treasury management activities. The only other element of this Guidance that applies to treasury management investments is the requirement to prioritise Security, Liquidity and Yield in that order of importance.

22. Local authorities should disclose the contribution that all other investments make towards the service delivery objectives and/or place making role of that local authority. It is for each local authority to define the types of contribution that investments can make and a single investment can make more than one type of contribution.

**Use of indicators**

23. The Strategy should include quantitative indicators that allow Councillors and the public to assess a local authority’s total risk exposure as a result of its investment decisions. This should include how investments are funded and the rate of return
received. Where investment decisions are funded by borrowing the indicators used should reflect the additional debt servicing costs taken on.

24. Local authorities should consider the most appropriate indicators to use, given their risk appetite and capital and investment strategies. Whilst this guidance does not prescribe specific indicators or thresholds, the indicators used should be consistent from year to year and should be presented in a way that allows elected members and the general public to understand a local authorities’ total risk exposure from treasury management and other types of investment.

25. Where a local authority has entered into a long term investment or has taken out long term debt to finance an investment the indicators used should allow Councillors and the general public to assess the risks and opportunities of the investment over both its payback period and over the repayment period of any debt taken out.

Security, Liquidity and Yield

26. A prudent investment policy will have two underlying objectives:
   - **Security** – protecting the capital sum invested from loss; and
   - **Liquidity** – ensuring the funds invested are available for expenditure when needed.

27. The generation of yield is distinct from these prudential objectives. However, this does not mean that local authorities are recommended to ignore potential revenues. Once proper levels of security and liquidity are determined, it will then be reasonable to consider what yield can be obtained consistent with these priorities.

28. When entering into treasury management investments, local authorities should consider security, liquidity and yield in that order of importance.

29. When entering into other types of investments local authorities should consider the balance between security, liquidity and yield based on their risk appetite and the contribution(s) of that investment activity.

Security

Financial Investments

30. Financial investments can fall into one of three categories:
   - **Specified investments**;
   - **Loans**; and
   - Other **Non-specified investments**.

Specified Investments
31. An investment is a specified investment if all of the following apply:
   - The investment is denominated in sterling and any payments or repayments in the respect of the investment are payable only in sterling.
   - The investment is not a long term investment. This means that the local authority has contractual right to repayment within 12 months, either because that is the expiry term of the investment or through a non-conditional option.
   - The making of the investment is not defined as capital expenditure by virtue of Regulation 25(1)(d) of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003 [as amended].
   - The investment is made with a body or in an investment scheme described as high quality (see paragraph 33 or with one of the following bodies:
     i. The United Kingdom Government;
     ii. A local authority in England or Wales (as defined in section 23 of the 2003 Act) or a similar body in Scotland or Northern Ireland; or
     iii. A parish council or community council.

32. For the purposes of paragraph 32 the Strategy should define high credit quality. Where this definition incorporates ratings provided by credit rating agencies paragraph 42 is relevant.

Loans

33. A local authority may choose to make loans to local enterprises, local charities, wholly owned companies and joint ventures as part of a wider strategy for local economic growth even though those loans may not all be seen as prudent if adopting a narrow definition of prioritising security and liquidity.

34. Local authorities can make such loans whilst continuing to have regard to this guidance if they can demonstrate in their Strategy that:
   - Total financial exposure to these type of loans is proportionate;
   - They have used an allowed “expected credit loss” model for loans and receivables as set out in International Financial Reporting Standard (IFRS) 9 Financial Instruments as adopted by proper practices to measure the credit risk of their loan portfolio;
   - They have appropriate credit control arrangements to recover overdue repayments in place; and
   - The local authority has formally agreed the total level of loans by type that it is willing to make and their total loan book is within their self-assessed limit.

Non-specified investments
35. A non-specified investment is any financial investment that is not a loan and does not meet the criteria to be treated as a specified investment.

36. For non-specified investments (i.e. those not meeting the criteria in paragraph 31), the Strategy should:
   - Set out procedures for determining which categories of investments may be prudently used (and where these procedures involve the use of credit ratings, paragraph 32 is relevant).
   - Identify which categories of investments have been defined as suitable for use.
   - State the upper limits for the maximum amounts both individually and cumulatively that may be held in each identified category and for the overall amount held in non-specified investments and confirm that investments made have remained within those limits.

Non-financial investments

37. As defined in paragraph 4 of this guidance non-financial investments are non-financial assets that the organisation holds primarily or partially to generate a profit. Where a local authority holds a non-financial investment, it will normally have a physical asset that can be realised to recoup the capital invested. Local authorities should consider whether the asset retains sufficient value to provide security of investment using the fair value model in International Accounting Standard 40: Investment Property as adapted by proper practices.

38. Where the fair value of non-financial investments is sufficient to provide security against loss, the Strategy should include a statement that a fair value assessment has been made within the past twelve months, and that the underlying assets provide security for capital investment.

39. Where the fair value of non-financial investments is no longer sufficient to provide security against loss, the Strategy should provide detail of the mitigating actions that the local authority is taking or proposes to take to protect the capital invested.

40. Where a local authority recognises a loss in the fair value of a non-financial investment as part of the year end accounts preparation and audit process, an updated Strategy should be presented to full council detailing the impact of the loss on the security of investments and any revenue consequences arising therefrom.

Risk Assessment

41. The Strategy should state the local authority’s approach to assessing risk of loss before entering into and whilst holding an investment, making clear in particular:
• How it has assessed the market that it is/will be competing in, the nature and level of competition, how it thinks that the market/customer needs will evolve over time, barriers to entry and exit and any ongoing investment requirements.

• Whether and, if so how, a local authority uses external advisors be they treasury management advisors, property investment advisors or any other relevant persons.

• How the local authority monitors and maintains the quality of advice provided by external advisors.

• To what extent, if at all, any risk assessment is based on credit ratings issued by credit ratings agencies.

• Where credit ratings are used, how frequently they are monitored and the procedures for taking action if credit ratings change.

• What other sources of information are used to assess and monitor risk.

**Liquidity**

42. For financial investments that are not treasury management investments or loans the Strategy should set out the procedures for determining the maximum periods for which funds may prudently be committed and state what those maximum periods are and how the local authority will stay within its stated investment limits.

43. For non-financial investments the Strategy should set out the procedures for ensuring that the funds can be accessed when they are needed, for example to repay capital borrowed. It should also state the local authority’s view of the liquidity of the investments that it holds, recognising that assets can take a considerable period to sell in certain market conditions. Where local authorities hold non-financial investment portfolios they can choose to assess liquidity by class of asset or at a portfolio level if appropriate.

**Proportionality**

44. Where a local authority is or plans to become dependent on profit generating investment activity to achieve a balanced revenue budget, the Strategy should detail the extent to which funding expenditure to meet the service delivery objectives and/or place making role of that local authority is dependent on achieving the expected net profit. In addition, the Strategy should detail the local authority’s contingency plans should it fail to achieve the expected net profit.

45. The assessment of dependence on profit generating investments and borrowing capacity allocated to funding these should be disclosed as a minimum over the life-cycle of the Medium Term Financial Plan. However, an assessment of longer term risks and opportunities is recommended.

**Borrowing in advance of need**
46. Authorities must not borrow more than or in advance of their needs purely in order to profit from the investment of the extra sums borrowed.

47. Where a local authority chooses to disregard the Prudential Code and this Guidance and borrows or has borrowed purely to profit from the investment of the extra sums borrowed the Strategy should explain:
   - Why the local authority has decided not to have regard to this Guidance or to the Prudential Code in this instance; and
   - The local authority’s policies in investing the money borrowed, including management of the risks, for example, of not achieving the desired profit or borrowing costs increasing.

**Capacity, skills and culture**

48. The Strategy should disclose the steps taken to ensure that those elected members and statutory officers involved in the investments decision making process have appropriate capacity, skills and information to enable them to take informed decisions as to whether to enter into a specific investment, to assess individual assessments in the context of the strategic objectives and risk profile of the local authority and to enable them to understand how the quantum of these decisions have changed the overall risk exposure of the local authority.

49. The Strategy should disclose the steps taken to ensure that those negotiating commercial deals are aware of the core principles of the prudential framework and of the regulatory regime within which local authorities operate.

50. Where appropriate the Strategy should comment on the corporate governance arrangements that have been put in place to ensure accountability, responsibility and authority for decision making on investment activities within the context of the local authority’s corporate values.
ANNEX A – INFORMAL COMMENTARY ON THE STATUTORY GUIDANCE ON LOCAL GOVERNMENT INVESTMENTS

Power under which this Guidance is issued [paragraph 1]

1. The Local Government Act 2003, section 15(1), requires a local authority "…to have regard (a) to such guidance as the Secretary of State may issue, and (b) to such other guidance as the Secretary of State may by regulations specify…".

2. The guidance on investments in the main part of this document is issued under section 15(1) of the 2003 Act and authorities are therefore required to have regard to it. This part (Annex A) contains an informal commentary ("the commentary") on the Statutory Guidance.

3. Two codes of practice issued by the Chartered Institute of Public Finance and Accountancy (CIPFA) contain investment guidance which complements the MHCLG guidance. These publications are:
   - Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes
   - The Prudential Code for Capital Finance in Local Authorities

4. Local authorities are required to have regard to the current editions of the CIPFA codes by regulations 2 and 24 of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003 [SI 3146] as amended.

Objectives in updating the Guidance

5. The 2nd edition of this Guidance, which was issued in 2010, reflected concerns raised by the CLG and Treasury Select committees as part of their enquiries into the financial crash of 2007-8. The key areas of focus were:
   - The practice of investing for yield, especially in Icelandic Banks;
   - The need for transparent investment strategies; and
   - The use of Treasury Management advisors.

6. The changes made to the 3rd edition of this Guidance reflect changes in patterns of local authority behaviour. Some local authorities are investing in non-financial assets, with the primary aim of generating profit. Others are entering into very long term investments or providing loans to local enterprises or third sector entities as part of regeneration or economic growth projects that are in line with their wider role for regeneration and place making.
7. In addition, the National Audit Office and the Public Accounts Committee have raised a number of concerns about local authority behaviour that this guidance aims to address. These are:

- Local authorities are exposing themselves to too much financial risk through borrowing and investment decisions;
- There is not enough transparency to understand the exposure that local authorities have as a result of borrowing and investment decisions; and
- Members do not always have sufficient expertise to understand the complex transactions that they have ultimate responsibility for approving.

Effective Date [paragraphs 11-12]

8. This Guidance applies from 1 April 2018. It supersedes all previous editions of the Guidance.

9. The Guidance requires local authorities to produce a number of additional disclosures. Many local authorities already produce these as part of internal reporting and risk management procedures. However, if these disclosures are not currently produced, then local authorities do not need to prepare them in full for Strategies presented to full Council or equivalent before 1 April 2018. Those local authorities who do not include the required disclosures in their 2018-19 strategies, should present them for approval the first time the relevant Strategy is updated or superseded.

Local Authorities [paragraphs 12-13]

10. This Guidance applies to all local authorities, who hold or during the next financial year intend to hold financial or non-financial investments, solely or in part to generate revenue income.

11. It applies to parish councils whose investments exceed the thresholds set out in paragraph 14. The decision to lower the financial threshold for parish councils has been taken in recognition that some parishes have begun to engage in commercial ventures. As parish councils tend to be fairly small and to obtain a greater percentage of their funding directly from council tax payers than other types of local authority, it is right that they demonstrate that they have carefully considered the expertise that they need to manage the risks arising from their strategy.

Transparency and democratic accountability [paragraphs 15-19]

12. The Government believes that local authorities need to be better at explaining “why” not just “what” they are doing with their investment activity. That means that the sector needs to demonstrate more transparency and openness and to
make it easier for informed observers to understand how good governance and
democratic accountability have been exercised.

13. The additional disclosures required by the Guidance should be included in a
single document presented to full Council or the equivalent. Although the
Guidance refers to an Investment Strategy, providing that all of the disclosures
are easy for interested parties to find and are in or linked from a single document,
a separate Strategy does not need to be prepared. The Strategy should be
updated at least annually.

14. Subject to the provisions in paragraph 35 and 36 of the commentary, local
authorities can exclude specific non-financial investments from the required
disclosures on grounds of commercial confidentiality. The Government expects
that non-disclosure on grounds of commercial confidentiality will be an
exceptional circumstance. A local authority should only determine that it would
breach commercial confidentiality to include an investment in the disclosures on
receipt of appropriate professional advice, using the same criteria as would be
used to exclude the public from a Council meeting. Local authorities should
reassess whether the commercial confidentiality test is met every time a new
Strategy is presented to full Council or the equivalent.

15. Under Regulation 17 of the *The Local Authorities (Executive Arrangements)*
(Meetings and Access to Information) (England) Regulations 2012 as amended
overview and scrutiny committee members have right of access to any
confidential information relating to any decision by any committee or any member
of the executive of their council. Nothing in this Guidance has the power to
override this regulation.

16. Assets that generate revenue income solely through fees and charges for
discretionary services levied under Section 93 of the *Local Government Act 2003*
should not be classified as non-financial investments for this purpose.

17. If disclosures are already produced in another document that is publicly available
then a local authority can provide a link to the disclosures from the Strategy
rather than reproducing them. The exception is disclosures contained in the
Statutory Accounts, which do not meet the requirements of this Strategy. This is
because local authority statutory accounts can be complex and difficult for users
who are not familiar with local government accounting to understand and
statutory accounts are prepared to a higher level of materiality than local
authorities should use for internal risk management.

Contribution [paragraphs 20-22]

18. Local authorities may have several different objectives, when deciding to acquire
an asset. If an asset is not solely held for yield, then a local authority may have a
different risk appetite or be willing to accept a lower return than it otherwise
would.
19. Each local authority should determine how it categorises different types of contribution, and each investment can have more than one type of contribution. A non-exhaustive list of types of contribution include:

- Yield/profit
- Regeneration
- Economic benefit/business rates growth
- Responding to local market failure
- Treasury management

20. Where a local authority classifies an investment as contributing to regeneration or local economic benefit, it should be able to demonstrate that the investment forms part of a project in its Local Plan.

Use of indicators [paragraphs 23-25]

21. Local authorities should present a range of indicators to allow members and other interested parties to understand the total exposure from borrowing and investment decisions. The indicators should cover both the local authority’s current position and the expected position assuming all planned investments for the following year are completed. The indicators do not need to take account of Treasury Management investments unless these are expected to be held for more than 12 months.

22. The Guidance requires local authorities to develop quantitative indicators that allow Councillors and the public to assess a local authority’s total risk exposure as a result of its investment decisions. We recommend that, the indicators in the table below are used. Where local authorities have a different risk appetite or different expectation of returns depending on the contribution(s) each type of investment makes, they should consider presenting the indicators, classified by type of contribution or risk appetite.
<table>
<thead>
<tr>
<th>Indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Debt to net service expenditure (NSE) ratio</td>
<td>Gross debt as a percentage of net service expenditure, where net service expenditure is a proxy for the size and financial strength of a local authority.</td>
</tr>
<tr>
<td>Commercial income to NSE ratio</td>
<td>Dependence on non-fees and charges income to deliver core services. Fees and charges should be netted off gross service expenditure to calculate NSE.</td>
</tr>
<tr>
<td>Investment cover ratio</td>
<td>The total net income from property investments, compared to the interest expense.</td>
</tr>
<tr>
<td>Loan to value ratio</td>
<td>The amount of debt compared to the total asset value.</td>
</tr>
<tr>
<td>Target income returns</td>
<td>Net revenue income compared to equity. This is a measure of achievement of the portfolio of properties.</td>
</tr>
<tr>
<td>Benchmarking of returns</td>
<td>As a measure against other investments and against other council’s property portfolios.</td>
</tr>
<tr>
<td>Gross and net income</td>
<td>The income received from the investment portfolio at a gross level and net level (less costs) over time.</td>
</tr>
<tr>
<td>Operating costs</td>
<td>The trend in operating costs of the non-financial investment portfolio over time, as the portfolio of non-financial investments expands.</td>
</tr>
<tr>
<td>Vacancy levels and Tenant exposures for non-financial investments</td>
<td>Monitoring vacancy levels (voids) ensure the property portfolio is being managed (including marketing and tenant relations) to ensure the portfolio is productive as possible.</td>
</tr>
</tbody>
</table>

23. Where appropriate, local authorities should consider including targets or limits set by members alongside the outturn. Where there has been a significant change in year on year performance against any of the indicators presented local authorities should include an explanation in the Strategy.

24. Local authorities can choose to present additional indicators in the Strategy should they believe that it would enhance understandability and transparency to do so.

Security, liquidity and yield [paragraphs 26-29]

25. For treasury management and other financial investments local authorities should continue to prioritise SECURITY, LIQUIDITY and YIELD in that order of importance.
26. Whilst consideration of security and liquidity is important for loans and non-financial investments, the relative balance between objectives may be different depending on the nature and objectives in making a specific investment.

Security and liquidity

Loans [paragraphs 33 – 34, 40]

27. Loans to joint ventures, local SMEs or third sector bodies, and wholly owned companies fall within the scope of the Guidance. When considering security and liquidity of loans local authorities should set limits for their total exposure and apply the expected loss model in line with the requirements of IFRS 9 Financial Instruments.

Non-financial investments [paragraphs 37-40, 43]

28. Where a local authority has a non-financial investment, it will have an asset that can be realised to recoup the sums invested. Therefore, the Guidance requires local authorities to consider security by reference to the value of the asset relative to purchase price and to set out the plans to recoup the investment if realising the asset would not recoup the sums invested. In the period immediately after purchase, it is normal for the directly attributable costs of purchasing a non-financial investment to be greater than the realisable value of the asset. In this scenario, all the Strategy needs to disclose is how long the local authority expects it to take for the increase in asset values to provide security for the sums invested and the assumptions underpinning that expectation.

29. Non-financial investments are by their nature illiquid. However, this does not mean that the local authority does not need to plan for realising a part of its non-financial investment portfolio, for example to repay debt. The liquidity of the non-financial investment portfolio should be considered over the repayment period of any debt taken out to acquire assets, which could be very long term. Given current trends such as the scale and pace of technology driven change, there is no guarantee that non-financial investments will continue to deliver value over their lifetime. To manage this risk, local authorities need to have plans to realise the capital tied up in non-financial investments if required. In addition, the Strategy should consider the trade-offs between accepting capital loss and refinancing debt incurring additional debt servicing costs by doing so, if appropriate.

Proportionality [paragraphs 44-45]

30. Local authorities need to consider the long term sustainability risk implicit in becoming too dependent on commercial income or in taking out too much debt relative to net service expenditure.
31. In addition, whilst under statute, local authority debt is secured on the revenues of that authority, in practice, there is no realistic prospect of the revenues of any local authority being sufficient to pay back debt equating to many multiples of the sum of NNDR and Council Tax Income, without a pervasive and long term impact on service delivery. It is unclear whether local authorities who have adopted a debt financed commercial investment strategy have realistic plans to manage failure. Whilst the Government recognises the importance of local authorities taking on debt to enhance service provision, irrespective of the source of finance, it does not believe that it should do the same for commercial investments.

32. For this reason, the Guidance introduces a new requirement that in every local authority, full council or its nearest equivalent, sets limits that cannot be exceeded for gross debt compared to net service expenditure, and for commercial income as a percentage of net service expenditure.

33. If a local authority has exceeded these limits through investments taken out prior to the introduction of this Guidance, it does not need to dispose of investments currently held. However, authorities who have exceeded their self-assessed limits should not enter into any further investments, irrespective of how these are financed, other than short term investments required for efficient treasury management.

**Borrowing in advance of need [paragraphs 46-47]**

34. The Prudential Code, issued by CIPFA has always contained a statement that local authorities should not borrow more than, or in advance of their needs purely in order to profit from the investment of the extra sums borrowed. The purpose of repeating that statement in this Guidance is to make it clear that it extends to borrowing taken on to finance the acquisition of non-financial as well as financial investments.

35. Local authorities can still finance the acquisition of financial on non financial investments from capital receipts generated from the sale of surplus assets. However, they should not repurpose receipts allocated to the acquisition of assets that contribute to service delivery to fund the purchase of investments, solely to avoid the requirements against borrowing in advance of need.

36. If exceptionally a local authority, chooses not to have regard to the provision on borrowing to fund investment activity the Guidance requires them to explain, in their Strategy, the rationale for this decision.

37. The purpose of this disclosure is to allow external auditors, tax payers and other interested parties to understand why the local authority has chosen to disregard
the Guidance, and to hold the authority to account should they believe there is not sufficient reason for doing so.

Capacity, Skills and Culture [paragraphs 48-50]

38. In the Public Accounts Committee report of 18 November 2016\(^1\), members raised concerns that, locally elected members may not always have the background and expertise to understand the risks associated with the decisions that they are being asked to make. For this reason the Guidance extends the requirements on capacity and skills to members and any statutory officers involved in or responsible for signing off on investment decisions.

39. Members do not necessarily need formal training in understanding investment risks to satisfy the requirements of the Guidance. Depending on their level of expertise a presentation setting out the risks and opportunities of an investment strategy/specific investment in terms a layman would understand, may be sufficient to meet the new requirements.

40. The Government is aware that many local authorities have brought in outside expertise to identify and negotiate investment opportunities. Whilst this can be an effective method of risk management, it is important that those negotiating deals understand that they are not operating in a purely commercial environment and that the prime purpose of a local authority is to deliver statutory services to local residents. Therefore, the Strategy should comment on how they have been made aware of this.
