**Supporting information requirements**

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

## Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

**Reason biodiversity net gain does not apply:**
Development subject to the de minimis exemption (development below the threshold)

**Do you confirm that the development falls below the impact threshold and that no onsite priority habitats are impacted?:**
Yes

**Please justify the reason why biodiversity net gain does not apply:**
The proposal relates to the partial demolition and conversion of an existing building and the creation of a small hard-surfaced parking area. The site currently comprises buildings with no vegetated habitat present. The development will therefore affect less than 25 m² of on-site habitat and no priority habitats or linear habitats. As such, the proposal falls within the de minimis exemption set out in the Biodiversity Gain Requirements (Exemptions) Regulations 2024 and mandatory biodiversity net gain does not apply.

Please read the help text for further information why developments may be exempt or not in scope.

### Evidence for 'de minimis' exemption claim

Government guidance strongly encourages the provision of evidence (e.g. plans and metric calculations) to allow the local authority to validate your exemption claim, even where the site is zero rated. Failure to submit sufficient information may result in your application being deemed invalid, delaying progress until it is provided.

Please provide the pre-development biodiversity value of onsite habitats on the date of calculation

Please provide the date the onsite pre-development biodiversity value was calculated

dd/mm/yyyy

This should be either the date of the application, or an earlier proposed date

Please provide the projected post-development biodiversity value

Please provide the reference for any document or supporting file (for example, the completed biodiversity metric calculation) that supports the values and justification above and will allow the local planning authority to confirm that the impact on on-site habitats falls below the de minimis threshold, taking into account any on-site priority habitats.

- [x] Mains sewer
