

View 7 | From Pendleton Road

Viewpoint.
Taken from the public highway at the rear gate on Pendleton Road, looking along the garden path towards the outbuildings.

What is visible.
The existing workshop gable end is almost entirely screened by the stone garden wall, the planting either side of the path and the existing greenhouse. Only a small part of it is glimpsed behind and through the greenhouse glazing (yellow dashed outline).

Proposed.
The replacement building occupies the same position. Its end elevation will sit behind the same wall, planting and greenhouse and will remain largely screened from this viewpoint. With a ridge about 300mm higher than the existing workshop, at most a slightly larger glimpse of sage-green timber and dark roof may be seen behind the greenhouse.

Note on View 2 (PH01).
View 2 on sheet PH01, which shows the full workshop gable end, was taken from within the garden of Eastwood House. It is not a view from Pendleton Road.

Part of existing workshop gable end glimpsed behind / through the greenhouse
