Hi Judith,

Please find attached the drawing for the Jet Wash enclosure.

There is a small amount of work to see it completed and operational.

On Sunday while painting it began to rain so that requires finishing.

Ive ask an electrician to come and fit a weatherproof switch to the outside of the box so it can be activated without opening the access hatch.

I hope this information satisfies the councils requirement.

Kind regards

Paul Orrell

P.S. Ive tried to attach some pictures of the construction but because the files are to big I will need to send them individually.
