- NOTES**
- All landscape proposals must be referred to by the Structural Engineer during foundation design.
  - All planting has been indicated making every effort to avoid conflict with highway land. Prior to submission it is the client's responsibility to ensure that all landscaping is reviewed by the project manager/highway engineer to ensure there is not conflict with highway land and future adaptions.
  - Shrub beds topped to a depth of 300mm, turfed areas to a depth of 100mm.
  - All planting to be implemented in accordance with horticultural best practice guidelines.
  - No species, variety, size or position to be amended without the Landscape Architects prior approval.
  - Before trees are planted, the Landscape Contractor shall ascertain the location of drains from the site manager, and shall if necessary make minor adjustments to tree positions to ensure that they are planted at least 1.5m from drains. They should however be planted no closer to houses/garages than is shown on the drawing, and if shown located in stub beds, the shape of the latter should be adjusted if necessary to accommodate the revised tree position.
  - If planting conditions are particularly poor e.g. waterlogged/frozen ground or poor soils, the Site Manager must be notified. All works will halt until conditions are considered acceptable.
  - All planting must be mulched to a depth of 75mm and in accordance with horticultural best practice guidelines ensuring plants are not buried.
  - If planting is required outside the October-March season, bare root trees will be replaced by a containerised equivalent to be approved by the project landscape architect.
